## Introduction

This Diploma Programme (DP) *Chemistry data booklet* accompanies the DP *Chemistry guide* and DP *Chemistry teacher support material*. It contains chemical and physical equations and constants, chemical symbols, the periodic table, and other chemical data relevant to the course.

Students must have access to a copy of this booklet for the duration of the course, so that they can become familiar with its contents. Direct reference is made to relevant equations in the “Understandings” sections of the guide. This helps to maintain the emphasis on interpretation and application rather than memorization of symbols, constants and equations.

Each student must have access to a clean copy of the *Chemistry data booklet* during examinations. It is the responsibility of the school to download a copy of this booklet from IBIS or the Programme Resource Centre and to ensure that there are sufficient copies available for all students.

# 1. Some relevant equations

$E = hf$
$n = \frac{m}{M}$
$n = CV$
$PV = nRT$
$\frac{P_1V_1}{T_1} = \frac{P_2V_2}{T_2}$
$Q = mc\Delta T$
$\% \text{ atom economy} = \frac{\text{molar mass of desired product}}{\text{molar mass of all reactants}} \times 100$
$\Delta H^\ominus = \sum(\Delta H_{\text{f}}^\ominus \text{ products}) - \sum(\Delta H_{\text{f}}^\ominus \text{ reactants})$
$\Delta H^\ominus = \sum(\Delta H_{\text{c}}^\ominus \text{ reactants}) - \sum(\Delta H_{\text{c}}^\ominus \text{ products})$
$\Delta G^\ominus = \Delta H^\ominus - T\Delta S^\ominus$
$\Delta G = \Delta G^\ominus + RT \ln Q$
$\Delta G^\ominus = -RT \ln K$
$\Delta G^\ominus = -nFE^\ominus$
$k = Ae^{\frac{-E_a}{RT}}$

## 16. Lattice enthalpies at 298.15 K (experimental values)

The lattice enthalpy values ( $\Delta H_{\text{lattice}}^{\ominus}$ ) in the following tables relate to the endothermic process  $M_aX_b(s) \rightarrow aM^{b+}(g) + bX^{a-}(g)$  in which the gaseous ions of a crystal are separated to an infinite distance from each other.

The data in these tables are experimental values obtained by means of a suitable Born–Haber cycle.
